Accessories

Connection for household appliances | truu connect.

Explains how to connect an additional household appliance to truu home or truu individual using the truu connect set. Contains information on scope of delivery, tank dimensions, and liability disclaimer for third-party devices.

Connection options

With this extension, an additional household appliance (dishwasher, washing machine, coffee machine, refrigerator, ...) can be connected to the truu home / truu individual from model year 2018 onwards. A connection to the truu mobile / truu outdoor is not possible.

one separate tank per household appliance

One separate tank is required for each connected household appliance to ensure trouble-free operation.

Scope of delivery

The truu connect home set includes the tank, the tubing, and all connection parts necessary for operation. The truu connect individual set additionally includes all components that must be retrofitted in the truu individual. Self-assembly is therefore not possible with the truu individual.

Volume & Dimensions

Property | Value

Tank volume | 4.5 L

Height | 36.6 cm

Diameter | 24.4 cm

Maximum pressure | 6.9 bar

Liability Disclaimer

We assume no liability for the operation of devices from third-party manufacturers. Prior to installation, a corresponding liability disclaimer must therefore be signed. It is recommended

to contact the respective manufacturer and have them confirm in writing the suitability for reverse osmosis / reverse osmosis (RO).

It's good.
to be truu.
